PROFILE

Hello, I'm Daniel, a software wizard from the digital jungle of NYC, where I turn complex code into show-stopping solutions, armed with a degree from the New York City College of Technology and a mastery in Python, Node, Go, and .NET Framework and JS frameworks(React, Vue, Angular). Like a knight in digital armor, I'm on a quest to transform chaotic ideas into harmonious digital realities. My dream? To build not just apps, but digital empires, teaming up with fellow tech enthusiasts to create extraordinary wonders in the world of software development.

PROFESSIONAL EXPERIENCE

Front-End Developer(Freelancer)

Big Digital

07/2023 – 10/2023
Toronto, On, Canada

- At Big Digital Company, I specialized as a front-end developer, creating interactive and user-friendly kiosk websites using React and Next.js.
- My expertise extended to implementing dynamic RSS feeds, enhancing content accessibility and engagement.
- I successfully led numerous projects, including a notable Call to Action initiative and contributed to a .NET application, showcasing versatility across different technologies.

This diverse project portfolio not only honed my front-end development skills but also underscored my ability to adapt and excel in various aspects of software development.

Software Engineer

Clutch

08/2023 – 10/2023
New York,
United States

- At Clutch Company, I thrived as a full-stack engineer, where I combined my proficiency in React, Next.js, and Tailwind CSS to craft visually appealing and responsive front-end interfaces.
- My role involved not just front-end development but also seamlessly integrating cutting-edge technologies like the Lens Protocol into our projects.

My tenure at Clutch Company was marked by a holistic approach to development, blending aesthetic front-end design with innovative back-end functionalities to deliver comprehensive and user-centric solutions.

Software Engineer

AdCritic

05/2023 – 06/2023
Nashville, Tennessee,
United States

- I specialized as a front-end developer, expertly handling technologies like React, Next.js, TypeScript, and Tailwind CSS to create innovative and responsive web applications
- My work was consistently characterized by high-quality deliverables, contributing significantly to the company's dynamic user interfaces and client satisfaction.

Software Engineer

Dante AI

08/2022 – 04/2023
United Kingdom

- Played a pivotal role as a front-end developer, Primarily using React to craft engaging and intuitive user interfaces for AI-driven platforms.
- Alongside front-end responsibilities, contributed significantly to Django-based backend development, ensuring robust and scalable integration with advanced AI systems.

This blend of front-end innovation and Django expertise was instrumental in advancing Dante AI's mission to deliver cutting-edge AI solutions.

EDUCATION

Bachelor of Technology(BTech), Software Development

City Tech, CUNY

09/2018 – 05/2022
New York, US
